

Note to Potential Customers Regarding False and Misleading Statements from Some Companies about Product Qualities and Performance

We have been installing synthetic grass products since 2004. We are licensed in landscape construction and synthetic products, and have 1,000's of satisfied clients in both the residential and commercial sectors. We specialize in high green content, innovative grass solutions with a variety of products and applications.

We have done work for the city of San Jose, the city of Fremont, city of Ripon, San Francisco, Santa Clara County, Contra Costa County, and Amador County to name a few. Nationally we have done work for numerous other cities and counties, and some of our commercial projects with ForeverLawn® include:

- The Disney Corporation
- Universal Studios
- Epcot Center
- Also, after two years of research, DuPont™ partnered with ForeverLawn® to research, develop, innovate and release new and better quality products to the landscape industry.

When we began in 2004 we had two products to offer. Today we have over 20 products. We do not have a "one size fits all" approach to turf. Many companies without our selection and workmanship will do anything to compete. Unfortunately these companies often make false and ignorant statements about synthetic grass. Some have done it for years, fighting not to lose market share when others like us have so much more to offer - and usually at a better price. Some have a culture of deceit, and have been warned to cease making false statements concerning ForeverLawn® products when soliciting potential customers. However, we can only control what we do and say. To prepare you for some of these ridiculous and outrageous statements and outright lies, here are some things to consider:

- **DuPont™ is a trusted brand with a long history of science & research.**
- **Since 2004 we have not had one issue with drainage, and we guarantee our drainage. I am not aware of even one drainage problem nationally including Florida where it can rain heavily.**
- **See the tests attached that prove our products drain in one hour more than it rains in the Bay Area for an entire year. MORE IN ONE HOUR THAN IN AN ENTIRE YEAR!**
- **Our products have NEVER had mold or mildew, and many of our products are antimicrobial.**
- **For more information about our products and safety visit ForeverLawn.com/safety/html**
- **As members of the Synthetic Turf Council (STC) we have a Code of Conduct to abide by. Turf companies that are not members (and some that are) may not abide by these standards.**

Your turf consultant will leave you with copies of the STC Code of Conduct and anything else necessary to refute the comments you may get from others. Feel free to educate them or show them the door. Also, I encourage you to contact me if any consultants from our company do not perform ethically. Representatives from other companies can be reported to the STC, the Contractors State License Board and the Better Business Bureau. **At the bottom of your work order there are email addresses and contact phone numbers for each organization.**

I have sold and installed synthetic grass since 2004. Feel free to call me personally should you have any questions. When it comes to experience, quality, variety, and workmanship we are the right choice.

Brian McGibbon
President - Field of Green Grass Solutions, Inc.
